

MEDIA RELEASE

Nullarbor Links “The Longest Golf Course in the World”

Date 12 May 2008

The Nullarbor Links concept is unique. The 18-hole par 72 golf course will span 1,365 kilometres with one hole in each participating town or roadhouse along the Eyre Highway, from Kalgoorlie in Western Australia to Ceduna in South Australia. Each hole will include a green and tee and somewhat rugged outback-style natural terrain fairway. The course would provide a quintessential Australian experience and a much-needed activity/attraction for travellers along the renowned desolate highway.

Nullarbor Links - “The World’s Longest Golf Course” project has commenced with the signing of a grant funding agreement between Eyre Highway Operators Association (represented by Vice Chairman Don Harrington and Secretary Alf Caputo), and AusIndustry, on 30 April 2008. Eyre Highway Operators were awarded \$331,000 grant funding under the Australian Government’s Australian Tourism Development Program. Attached is a schedule of the project plan as per the contract.

The Association also wishes to announce major partnerships with **Macmahon** and **Spectrum Survey**.

Spectrum Survey will be chartered to complete the mapping and surveying of the 11 holes that need to be built. **Mr Russell Haig**, Director of **Spectrum** said “It is a real privilege for our company to be involved with such a significant tourism project in Western Australia”.

Macmahon will provide the earthworks and road base for the placement of the 11 greens, tees and the scaping of the natural terrain fairways.

These three partners are vital players in the building of “**The Real Australian Golf Course**”.
